In today's aggressive business environment it is essential to be prepared to face a vast and competitive world. In this time of diminishing global economic situation, the most worried sectors are the mid to small size manufacturing businesses. They are challenged by the requirement of the customer and compliance mandates, effective management of supplier, costs control and finding new customers to grow the business.

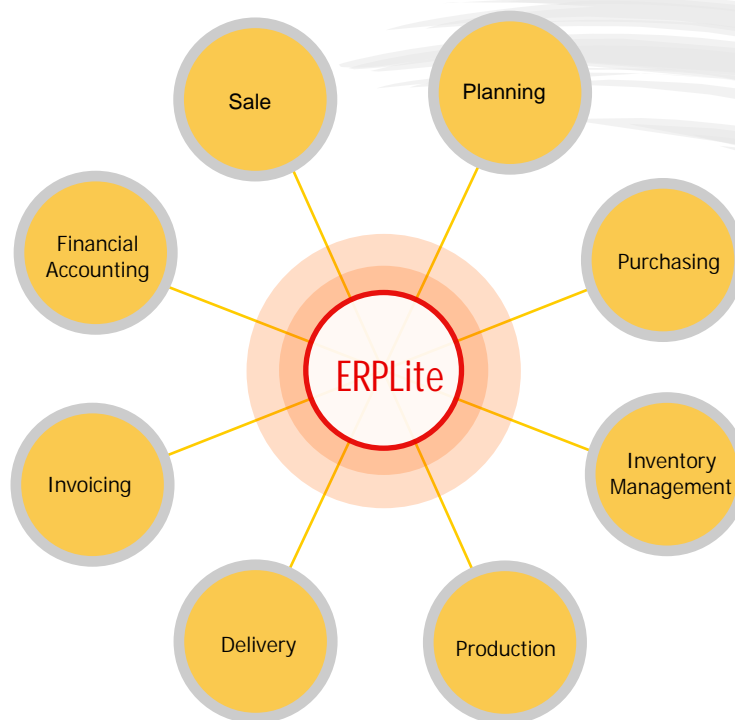

Topnotch ERPLite ERP offers solution that enables manufacturers to compete in the prevailing market atmosphere. ERPLite Manufacturing has the capacity of both finite and infinite planning capabilities which assist you to develop original schedule. ERPLite Manufacturing Management also transforms the supply chain to achieve production plan with your sales, manufacturing, finance and customers.

In most organizations today, visitors just scribble a name in a paper guest book. With Topnotch VAMS, relevant information about the visitors is captured in a secure database, including their photo, the name of the person being visited, the reason for the visit, and their entry and exit times. In less than five minutes, the person is professionally checked in and a Visitor Access Pass is automatically printed.

## Why Switch to Visitor Access Management System (VAMS)

Paper guest books have been around forever. They are certainly cheap and easy to use. But the data collected is usually incomplete, often difficult to read, and impossible to analyze. And perhaps more importantly, confidential information about who has recently visited your facility is out in the open and readily available to anyone who wants to flip through the book's pages.

These drawbacks may have been acceptable up years ago, but post 9/11, tighter security is now a necessity. As part of the overall strategy to improve security, most experts are encouraging organizations to do a better job of keeping track of who is in their buildings and why.

## Highlights:

- Securing the workplace more robustly.
- Streamlining the visitor check-in process.
- Capturing visitor information more accurately and automatically.
- Able perform analysis and reporting on visitor data across multiple locations.
- Keeping visitor and company information confidential.
- Enhancing the organization's image and making visitors and employees feel safer.
- Networking multiple locations together to show a single visitor database.

# Content Management Solution

Web-based content management solution provides your organization with a solution to manage all web site content and empowers all staff members (even those with few technical skills and no knowledge of HTML) to easily maintain their content areas.

WCMS is not a one-size-fits-all product, but rather a powerful solution that Topnotch custom builds for each of its clients. The feature-rich, relational database-driven system instantly updates your content in "real time" while maintaining standards of consistency throughout. Our content management solutions allow your staff to add any content they want—text, graphs, and images even Word or PDF files can easily be uploaded to your site.

Topnotch allows your organization to grant users different levels of access to update specific portions of the site. Once changes have been made, an administrator can preview and approve the pages before publishing. This helps all facets of your organization benefit from the system. Since WCMS is web-based, users can also update content from any Internet connection—anywhere in the world.

As your needs grow, Topnotch expands to meet them. Topnotch will construct the information architecture of your site so that users can easily add or delete pages of content when needed. The result is a reduced workload for your IT staff, lower maintenance costs, and speedier updates for your website.

## Highlights:

- ✔ HTML-free Publishing
- ✔ Fully Scalable Design
- ✔ Multiple User Permissions
- ✔ Custom Work Flows
- ✔ "Print This" & "Email This"
- ✔ Content Consistency
- ✔ Publishing Approval & Staging
- ✔ Real-time Data Backup
- ✔ Auto-archiving
- ✔ Low Ownership Costs
- ✔ Web Stats Analysis
- ✔ Real-time Publishing
- ✔ Template-based Authoring
- ✔ Audit Trails & Security
- ✔ Scheduled & Delayed Publishing
- ✔ Multiple Site Management
- ✔ Advanced Search
- ✔ Image & File Repository
- ✔ WYSIWYG Environment
